MATH 204 – PROBABILITY AND STATISTICS				
Course Code	Course Name			Semester
MAT204	Probability and Statistics			Fall ☐ Spring ☒
Course Hours			Course Hours	Credit
Theory	Application	Laboratory	3	5
3	-	-		

Course Details	
Department	Nanotechnology Engineering
Course Language	English
Course Level	Bachelor's Degree ☒ Master's Degree ☐
Education Type	Formal Education ☒ Distance ☐ Hybrid ☐
Course Type	Compulsory ☒ Elective ☐
Course Objectives	To teach engineering students the necessary probability and statistical techniques, to be able to interpret the results of statistical analysis and to make correct statistical decisions.
Course Content	Application of basic concepts in probability and statistics with engineering. Topics: descriptive and inferential statistics, probability, discrete and continuous random variables, confidence interval estimation, regression and correlation, analysis of variance.
Course Methods and Techniques	Lecture ☒ Question-Answer ☒ Presentation ☐ Discussion ☐
Prerequisites	Math
Workplace Status	-

Recommended Books

Weekly Schedule

No	Topics
1	Introduction to Statistics: History, Subject, Classification, Stages and Statistical Definitions and Concepts
2	Distributions and Classification: Frequency and Cumulative Frequency Distributions
3	Measures of Central Tendency
4	Measures of Central Dispersion
5	Random Variables and Probability Distributions; Conditional Probability and Bayes Theorem
6	Discrete Probability Distributions (Binomial, Poisson, Hypergeometric)
7	Normal Distribution
8	Midterm Exam
9	Sampling Theory
10	Statistical Forecasting Theory
11	Confidence Interval and Confidence Limits
12	Statistical Decision Theory (Hypothesis Testing)
13	Regression and Correlation Analysis
14	One-Way Analysis of Variance (ANOVA)
15	Two-Way Analysis of Variance
16	General Exam

Evaluation Criteria

Semester Studies	Number	Contribution Share
Attendance	1	5
Laboratory		
Application		
Fieldwork		
Course Specific Workplace Training		
Quizzes/Studio/Critical		
Homework	3	20 (10+5+5)
Presentation		
Projects		
Report		
Seminar		
Midterm Exams/Midterm Jury	1	25
General Examination/Final Jury/Delivery	1	50
Total		%100
Contribution of Semester Studies to Success Grade		
Contribution of End of Semester Studies to Success Grade		
Total		%100

ECTS/ Workload Table

Report			
Midterm and Midterm Exam Preparation	1	10	10
General Examination and General Examination Preparation	1	20	20
Total Workload			114
Total Workload / 25			4,56
ECTS Credit			5

Course Learning Outcomes

No	Description
Ö1	Define the basic concepts of probability and statistics.
Ö2	Calculate types of probability, independent events, Bayes theorem and conditional probability.
Ö3	Summarize and interpret engineering problems using descriptive statistics.
Ö4	Solve engineering problems with inferential statistics (hypothesis testing).
Ö5	Solve and interpret statistical problems using computers, in addition to the ability to calculate with formulas to solve engineering problems.

Contribution of Course Learning Outcomes to Program Learning Outcomes

Contribution Level: 1: Very Low, 2: Low, 3: Medium, 4: High, 5: Very High

	P1	P2	P3	P4	P5	P6	P7	P8	P9	P10	P11	P12	P13	P14	P15	Total
